

## ACADECAMP SUMMER 2021 (AGES 4-9)

### Sessions and Registration Form

This summer, AcadeCamp is excited to offer a **virtual** summer in the art gallery! AcadeCampers will explore famous art, and artists, and look at their connections to mathematics. Campers will be exposed to: 2D figures, grids and multiplication, measurement, patterns, fractions, lines, music and dance, and 3D shapes. Each week, campers will learn about a variety of art that can be done using that specific math concept, and will create an abundance of original artwork.

Sessions will be delivered virtually through the same, tried and tested, online platforms Acadecap International School has been using for its virtual classes during learn from home periods. Counsellors will be delivering sessions in real-time through Google Meet, and campers will be able to interact with their counsellors and peers as though they were in a regular classroom. To access Google Meet and our online camp resources, all campers will receive a temporary Acadecap.org account valid for the summer of 2021.

The weekly, bilingual AcadeCamp STEAM experience is enhanced this summer by:

- Explorations in real-life Math and Art
- Cooperative, real-world, multicultural, and "I-can-relate" context
- Small Group, Personalized and Across the Ages Learning, Teacher Supervised
- Songs, Word Play, Literary Connections and Experiments in French
- Expert Guests and Walking Distance Field Trips
- Interconnected and Cumulative Play and Learning
- K2 Martial Art Jiu-jitsu Class
- Outdoor Activities

Each week, the Friday Afternoon Project Showcase challenges AcadeCampers to find an innovative way to summarize and present what they have learned in Science, Technology, Engineering, Art and Architecture and Math (STEAM).

**NOTE: We are monitoring the evolving situation and are awaiting guidelines concerning the opening of day camps in our PHU. Parents will be notified once in-person camps can be offered.**

#### Week 1: June 21 – June 25

#### KANDINSKY'S 2D FIGURES

Exploring Kandinsky's art, campers will jump into the world of 2D figures. AcadeCampers will learn about 2D figures and their properties. Campers will participate in a variety of engaging activities about 2D figures and how they relate to art, and create artwork inspired by Kandinsky.

#### Week 2: June 28 – July 2 (4 days)

#### PAT LIPSKY'S GRIDS AND MULTIPLICATION

Inspired by Pat Lipsky's grid art, campers will learn about multiplication grids and number patterns in art and math. Campers will create spirolaterals, learn about the Fibonacci sequence, and create an array city.

#### Week 3: July 5 – July 9

#### PIET MONDRIAN'S MEASUREMENT

Using Piet Mondrian's famous square and rectangle artwork, campers will develop skills in measurement; learning about perimeter, area and volume. Campers will apply these lessons to create art that demonstrates these concepts.

**Week 4: July 12 – July 16****M.C. ESCHER'S PATTERNS**

M.C. Escher, the master of tessellations, is the inspiration for this week! Campers will explore the world of patterns, and learn about reflections, translations and rotations. Campers will create their own tiles, quilts and artwork using the skills they've learned this week.

**Week 5: July 19 – July 23****PAUL KLEE'S FRACTIONS**

Exploring Paul Klee's colour grids, campers will discover the world of fractions. Campers will learn to identify fractions, compare fractions, and create art using fractions. They will explore hands-on activities, and create unique and colourful artwork.

**Week 6: July 26 – July 30****JACKSON POLLOCK'S LINES**

Inspired by Jackson Pollock's abstract artwork, campers will explore the use of lines in art and math. Learning about different types of lines, and parallel and perpendicular lines, campers will create artwork that incorporates math and art seamlessly.

**Week 7: August 3 – August 6 (4 days) MOVING TO THE RHYTHM**

Using music and dance, campers will explore how mathematics is incorporated into the arts. AcadeCampers will learn about fractions in music, space and geometry in dance, making music with their bodies and calculating the tempo. This week is a hands-on, kinesthetic learning experience!

**Week 8: August 9 – August 13****PICASSO'S 3D SHAPES**

This week, Picasso's artwork depicting 3D shapes inspires campers to inquire into 3D art. Campers will dive into 3D shapes, nets, sculpting, and shading to create spectacular artwork.

**2021 SUMMER READING & WRITING PROGRAMME: Systematic Multisensory Intensive Literacy Education (SMILE)**

For students with reading and writing difficulties, we offer SMILE, Orton Gillingham-based multisensory teaching sessions, in addition to the activities provided during our AcadeCamp or AcadeCoders sessions. The OG multisensory teaching sessions will be offered for 1 hour, 5 times a week (4 times a week during holiday weeks), and the participant must register for at least 4 weeks, or preferably all summer, in order for the programme to be effective. If a student has not been evaluated previously, pre- and post-testing will be provided. With the Orton Gillingham approach, a student learns using the visual, auditory, kinesthetic, and tactile senses simultaneously. The SMILE sessions will take place within the 9:00 am – 2:00 pm camp day.
