ACADECAP NIGHT OF THEATRE

It was a magical night filled with the laughter of family and friends who came to watch the three performances of the evening.

As part of the French programme, we adapted the story “Le petit prince” to create an original play. First we selected the important parts of the story, to create the different scenes in the play. Next we worked together to write a summary of each important scene. Finally we used the summaries to create a script to tell the story. We each choose a part to portray in the play.

The story of Le Petit Prince follows a little prince who is exploring the galaxy. Along the way he meets different people and gains their wisdom from each person. The story end wth the prince understanding that grown-ups are hopelessly narrow-minded and in contrast, children come to wisdom through open-mindedness and a willingness to explore the world around them and within themselves.

Signed,

The Hive Students

OVERVIEW:

Night of Theatre

Humanities Board Games

Biology Dissection

Van Gogh Inspired Art Installation

AcadeCabaret and Awards Event

Grade 7/8 Humanities Board Games

The global pandemic has brought forth many changes in our lives. With the increase of family time spent indoors, board games became an engaging way to pass time. With such a variety of games available, it is easy to find one to suit all interests and ages. Students in Grade 7 and 8 will use their knowledge about Canada and its global relationships during the 18th and 19th century, to develop their own game. The board game will emphasize a particularly important event during this period of history and will include pawns/characters of significant historical relevance. For inspiration, students enjoyed a morning playing strategic and logic board games.

Biology 11 Fetal Pig Dissection

A fetal pig dissection provides a hands-on opportunity for students to engage in an investigation of anatomy and physiology. The fetal pig is chosen because it has body systems that are similar to the human body systems. During the dissection, students make links between structure and function and begin to identify interrelationships between the circulatory, respiratory, and digestive systems.

Visual Arts 7/8

In Visual Arts class, student's have been working diligently on their Van Gogh inspired painted chairs. They have created their individual artworks by studying Van Gogh paintings, color schemes, and painting techniques. The Hives original artwork of chairs will be displayed at the AcadeCap Cabaret and Awards Night for everyone to enjoy. Additional artwork from the Hive is on display in the art lab and gallery at the school. Please enjoy all the artwork the students have created this year!

AcadeCabaret / Recognition and Awards Event

Join us on Friday, June 17th for the afternoon to celebrate the end of an awesome school year. The AcadeCabaret is a combination of a recital for violin and piano as well as short presentations of poetry, skits, readings and more linked to the units of inquiry and study. Recognition and Awards Night is when students, families and staff come together to celebrate the successes and achievements of the current school year.
